uPVC Piezometric/Geo Technical pipes

Vinyl always cares for the environment and offers an extensive range of products for all activities relating to the monitoring of the subsoil. The piezometric/Geo technical pipes meet the many needs of the field, from the study and surveying of contaminated sites to the analysis and monitoring of underground water (e.g. piezometric head of groundwater).

uPVC Piezometric/ Geo Technical pipes allow to investigate contaminated sites and to monitor underground waters (piezometric reading of ground water tables). These filters are available with many diameters and different slot's dimensions in relation of ground size. These pipes allow problems associated with monitoring underground waters to be resolved.

Vinyl's uPVC Piezometric/ Geo technical pipes allow the problems associated with the study and investigation of contaminated sites and groundwater monitoring are performed simply and securely without risk of contamination of samples collected.

- Easy installation, handling and transport due to low weight.
- Suitable for transportation of drinking water due to its inert characteristics.
- Durability - useful life of over 100 years without showing wear due to fouling, chemical action and the surrounding environment.
- Low cost compared to other products on the market.
- Coupling system through thread with trapezoidal profile.

Applications:

**GROUNDWATER MONITORING
SAMPLING OF GROUNDWATER
INSTALLATION OF DATA LOGGER**

Ext Inch	Int mm	Spessore Thickness mm	Ext Sleeve/ Socket mm	Thread Types	Length Of Item	Weight Kg/mt
1/2"	15.9	2.6	26	Gas	0-3	0.2
3/4"	21.3	2.6	30	Gas	0-3	0.3
